CROFT LILIES FOR QUALITY POT PLANTS

Vaughan's BOOK FOR FLORISTS *Autumn 1947*

601 W. JACKSON BLVD., CHICAGO 6—47 BARCLAY ST., NEW YORK

We Pay Ocean Freight and Duty

Consider this when comparing prices in this catalog with those quoted by Dutch salesmen.

When you buy from Vaughan's you are charged only with the prices quoted. You do not have to pay, in addition to the invoice price, which may have seemed low when you placed the order, substantial additional charges to cover ocean freight, duty, and other expenses which you had no way of estimating in advance.

We pay all these; they are covered by our prices, and, because we import large quantities and handle shipments in the most efficient manner, your share is much reduced. Handling charges from Holland, and all freight charges will be much higher than last year.

Weather in Holland has been unfavorable as it has been in this country. Advises on bulb crops state:

HYACINTHS, only fair. Sizes averaging smaller.

TULIPS, fair; it is expected the amount of saleable bulbs will be 20 to 25 percent less than last season.

CROCUS, severely damaged; only medium crop expected.

NARCISSI, severely damaged.

MISCELLANEOUS BULBS, good.

Exports to other countries will be heavier, and prices are stiffening, with prospects of further rises. Lilies are an exception, and except for Rubrum, will be somewhat lower than last year, especially Croft lilies.

American Narcissus production in Oregon and Washington continues short, with prices about the same as last year.

All orders for Holland Bulbs placed with us before June 15th at open prices will receive a special Import Rate.

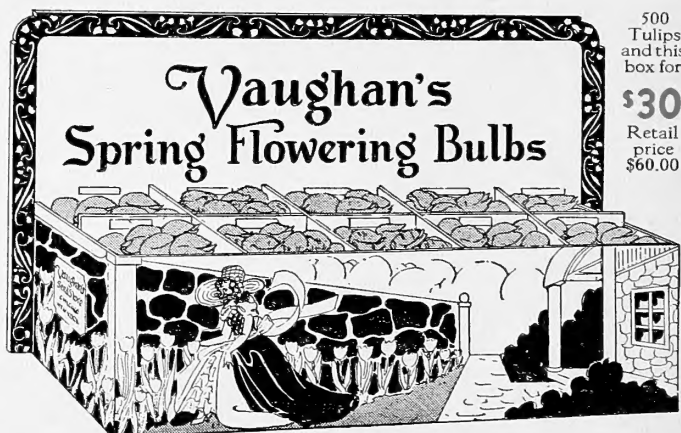

Double Your Money on Tulips Sold from this Attractive Display

MERCHANDISING bulbs belongs to the florist, who can supply expert advice to purchasers. Profits are large; there is no spoilage; and the business harmonizes with the florist's line, an important point. Our beautiful display box will be an ornament in any flower shop.

Vaughan's ten-compartment display box, staunchly made of 100 point cardboard printed in brilliant colors, will hold 500 bulbs, 50 each of ten varieties.

This beautiful display box, with 500 First Size May-flowering tulips, 50 each of ten named varieties, separately bagged, \$30.00

We use FIRST SIZE BULBS, the size which sells best over the counter. The 10 named varieties (50 each) of good named varieties. The price to you is \$30.00 for the box and 500 bulbs of 10 named varieties. You retail them for \$1.50 a dozen, or more, because the selection is worth more, doubling your money. Each variety is packed 50 in a bag labeled with its name. You empty one bag into a compartment, and refill in the same manner when it is empty. This prevents mixtures and loss of bulbs. After the display box and first collection have been bought, refill orders will be accepted for \$29.50 for 500 bulbs, 50 each of 10 varieties, in bags of 50; or \$58.00 for 1,000 bulbs, 100 each of ten varieties. Colored pictures are provided to paste on the compartments. This box keeps the bulbs in the open air, thus preventing bacterial rot which comes when they are sealed in cartons. The named varieties are kept apart without mixing, which adds greatly to their value. Varieties Subject to Change Without Notice.

Tulip Display Box Holding 500 Bulbs, 50 each of 10 Named Varieties

Counter Space Needed, 13x29 Inches.

The display box with its garden design printed in brilliant colors, occupies very little space on your counter. It is an ornament to any store. It solves the problem of offering bulbs for sale in the retail shop, without danger of mixing varieties, and losing stock.

Secrets of Success in Forcing Fall Bulbs

Success in forcing tulips, narcissi, hyacinths, and iris in greenhouses and cold frames is largely dependent upon temperature control. All the factors which influence healthy growth are discussed in the following digest. It combines the basic principles originally established by scientific investigation in Holland, with the results of long experience in producing and forcing tulips under conditions prevailing in the United States. Every florist who attempts to grow these bulbs in a greenhouse or cold frame should be familiar with the facts which follow.

PRINCIPLES OF GROWTH ON TULIPS AND NARCISSUS

In forcing bulbs exact temperature control must be maintained for optimum results. Following are some of the growing principles that must be followed to get consistently good results from year to year.

When you receive bulbs from us, initiation of their flower buds is complete, and the floral parts may be examined by cutting a few bulbs horizontally with a knife and examining with a microscope. All the parts of the flower should be visible including petals, stamens and pistil. To find the flower bud, start cutting the bulb in the center and gradually work down by small segments in layers. The leaves will surround the flower, and will be cut first, and should not be confused with the flower part. Most varieties respond best to 68° F until the bud has been initiated in the bulb. After bud initiation 48° F is the proper storage temperature.

Precooling is the procedure of controlling the temperature so that the leaves, stem and flower bud elongate most rapidly in proper balance with one another. Most varieties respond best at 48° F for the elongation period. Vaughan's precooled bulbs have been given the optimum elongation temperature, as soon as possible after bud initiation has been complete, so that the best and earliest blooms possible can be obtained.

PROCEDURE FOR GROWER TO FOLLOW

Upon receiving either precooled or regular Tulip bulbs, plant them at once and grow them as close to 48° F temperature as possible until the shoots are about 2 to 3 inches high. When the plants are at least 2 to 3 inches high they may be moved to the greenhouse bench at listed dates for each variety. When the shoots start to emerge, it is wise to spray all flats or pots with a solution of fermate made in the proportion of 1 pound of fermate to 100 gallons of water with 4 ounces of Grasseli S. S. 3 combined spreader and sticker. This spray will control and prevent the spread of fungous diseases including Botrytis, or tulip "Fire". A dust of 50% sulfur and 50% hydrated lime can also be used with good results particularly as a preventive. This dust should be applied freely after each watering until the flats or pots are removed to the growing bench.

Tulip bulbs can never be "forced" without taking unnecessary chances of white tip, bud blast or soft, poor quality bloom. If the temperature control has been followed as above, the best and earliest bloom will result without growing at above 60° F. Only certain varieties respond favorable to precooling and early forcing, and poor results will be obtained if late varieties are put in the growing bench too soon. Bulb seasons vary as to their early forcing qualities, and it is necessary to play a little on the late side by a week or so rather than risk the entire crop. 60° F means Day and Night temperatures,

and we recommend growing the first two weeks in the bench at 55° F. We have seen bulbs grown at 60° F come perfectly one week after those grown at 67° F had white tip and blasted buds. We recommend the following varieties for early bloom in order of benching and earliness. Single Early and Mendel tulips come into bloom early but their substance generally does not come up to Cottage or Darwins. Approximate dates follow.

PRECOOLED TULIPS

	Benching	Blooming
Albino	November 30	January 1
Golden Harvest	December 10	January 10
Rose Copeland	December 10	January 10
Wm. Copeland	December 10	January 10
Wm. Pitt	December 20	January 20
Bartigon	December 31	February 10

REGULAR TULIPS

Albino	December 14	January 21
Golden Harvest	December 21	February 1
Rose Copeland	December 21	February 1
Wm. Copeland	December 21	February 1
Wm. Pitt	December 31	February 10
Bartigon	January 10	February 20

Varieties may be held for later blooming by continuing the growing at 48° F until the plants are almost ready to bloom in storage or by growing cooler than 60° F on the bench. Tulips should be planted in well drained soil, and not over watered or under watered. They will need more frequent waterings on the bench than in storage. Any well balanced fertilizer improves the color of foliage and flowers, but do not use an overdose.

If it is impossible to plant bulbs at once on their arrival, at least unpack and store them as close to 48° F as possible. Nothing will spoil them faster than temperatures above 70° F.

If you are going to grow them in a cold frame, pick a site with good drainage and water with cold water thoroughly before placing the flats or pots. A shady spot is preferable so that the sun does not keep the soil temperature high during possible warm Fall days. Cover the flats or pots with 3 or 4 inches of sand so that sprouts will not be broken easily when the time comes for moving into the greenhouse. Where winters are severe, put on a heavy layer of leaves or straw just before hard freezes are apt to come in your temperature zone. Spray the tops of pots or flats with Fermate mixture or dust with sulfur mixture on bringing into the greenhouse. Grow day and night at 60° F or below; or 55° F at night and 63° F during the day. Generally

speaking tulips grown in storage that is too cold will grow too short with large flowers; if grown in storage that is too warm the flowers will be small on thin, weak stems. Extreme heat in the greenhouses, any temperature from 67° F and up, may cause buds to blast or flower tips to turn white, and have poor color. If the plants become dry at any stage of growth bud blast will result.

We strongly recommend treating all tulip bulbs before planting by dusting with Spergon at the approximate rate of 1 lb. for each 3000 bulbs. Spergon is obtainable in units of 1 oz., 1 lb., 10 lbs. and 100 lbs. This treatment results in giving more even growth of plants by better rooting conditions.

IRIS

Iris bulbs do not have the flower buds initiated until the plant is approximately 2½ inches high in growth and large sizes only may be used for early flowering. Upon receipt of Iris Wedgewood 10 ctm. and up you should plant them and grow at 55° F, not higher, in the bench or in storage; 48° F would be acceptable but delays growth about one week. After the plants are 2½ inches high they should be definitely moved to the greenhouse and the day or night temperature should never be allowed to go above 60° F. Iris need lots of water and can not withstand dry soil conditions. Plant the bulbs shallow in deep flats. Late varieties or small sized Iris bulbs should be grown more slowly at about 45° to 50° F until about two weeks before blooming time when the temperature may be raised to 60° F days and 55° F nights. Plant Iris in deep flats so the roots have plenty of room, and the plants require good light conditions. Foliage may be trimmed as necessary to allow more light and decrease evaporation and drying out of flats, benches or pots.

NARCISSUS KING ALFRED

Plant all Narcissus bulbs as soon as received. Bulbs should be grown at 48° F until the shoots are 2 to 3 inches long at least. It does not hurt them to be left in much longer. Precooled King Alfred may be put on the bench as soon as they are 3 inches long. Grow at 60° F for three weeks and finish at 65° F. Narcissi like well drained soil, but water when heavy foliage growth is in crop. November 28 should be about the proper date to set precooled stock on the bench from the bulb cellar or cold frame. Regular stock of King Alfred should follow 2 to 3 weeks later, continuing with other varieties as their foliage indicates on forcing types.

We recommend treating all hardy Narcissus such as King Alfred and especially the Bicolors, by dusting Tersan on the bulbs at approximate rate of 1 lb. per 2500 bulbs for the prevention of basal rot in Narcissus, and for more even plant growth. Tersan is obtainable in units of 8 oz., 4 lbs., 25 lbs. and 100 lbs.

HYACINTHS

Hyacinths if not planted immediately should be stored at 70° F in a dry place. Delayed planting is permissible for getting quality blooms late. Grow at 50° F in storage until the flower bud is entirely out of bulb at which time transfer to greenhouse for growing on gradually, increasing the temperature up to 70° F over a period of two weeks.

BULB CULTURE SUMMARIZED

The principal points for success with bulb stock of Tulips, Iris and Narcissus are:

1. Order and plant Tulips and Narcissus on time from September 1 to October 15. Best results out doors are obtained from these planting dates also.
2. Use moist soil in planting bulbs, and plant shallow so there is plenty of food and room for the roots. Water well after planting.
3. After unpacking as soon as received, store bulbs as close to 48° F as possible. Bulbs give off heat; in closed containers this can be serious.
4. Plant as soon as possible, and grow at 48° F until plants are 2 to 3 inches high. All bulbs should be well rooted before being brought into greenhouse. 48° F is a good rooting temperature. If bulbs have heaved up in the flats or pots by their rapid rooting, they should be pressed down again with careful handling.
5. In the greenhouse grow cool, never above 60° F early, or 65° F for last two weeks of growth.

6. Do not allow flats or pots to dry out.
7. Do not plant Iris too close on benches, 3 inches apart in 4 inch rows is about right, or 3½" x 3½" in flats.
8. Use preventive spray or dust on Tulips.
9. Watch out for bright days raising house temperatures above maximum allowed. Nothing will spoil them faster than temperatures above 70° F.
10. Get to know varieties.
11. Buy from a reliable source where honest size of bulbs, and true varieties can be expected on delivery.
12. Overhead heat is best for bulb culture as pipes under the bench often heat the plants more than the house thermometer indicates. Where pipes under the bench are used it is wise to string a roll of wrapping paper about a foot high above the edge of each side of the bench. This prevents warm air from circulating up around the side of the bench and drying and heating flats along the edges.
13. We have found dusting bulbs with Spergon is a good preventive of rooting troubles in Tulip culture, particularly in late field plantings.
14. Check your thermometers for accuracy. It is not unusual to find thermometers 5 degrees off and this could ruin a bulb crop run at 65° F close to maximum.

DIEBACK

BUNCHY TOP

TYPICAL LEAF NEMATODE INJURY

CROFT LILY LEAF NEMATODES

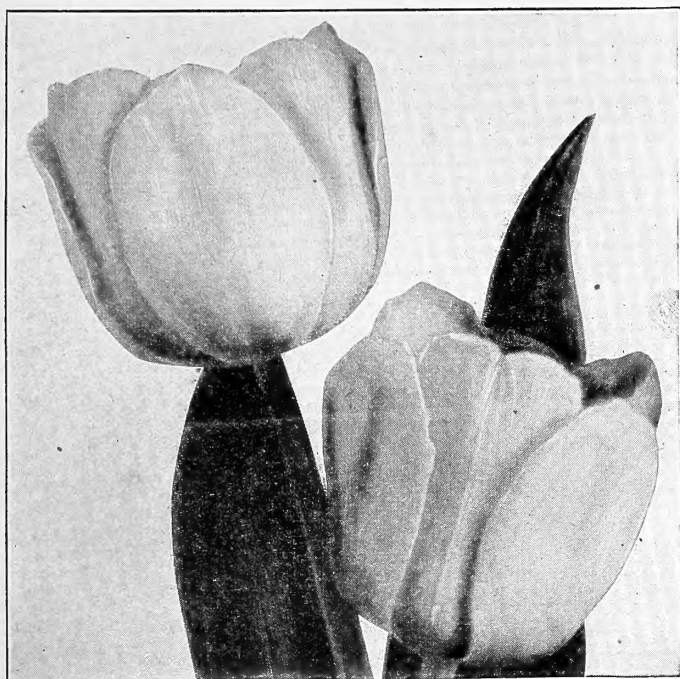

A spreading infestation of leaf nematodes has appeared in the Croft Lily fields of the west coast. Injury by these microscopic pests results in a deformation of the plants and the nematodes from infested bulbs grown in greenhouses may multiply rapidly and spread to adjacent healthy plants.

Florists will take big chances in ordering bulbs from uninspected fields. We have had to reject bulbs of several growers who were formerly among our best suppliers. Nematodes multiply rapidly at greenhouse temperatures and moist air. They spread from plant to plant in moisture on the leaves. Overhead syringing, especially with warm water, will hasten the spread.

Diseased plants should be removed and destroyed as soon as detected. Symptoms appear in several forms: (1) Dieback, distinguished by leaves in the center of the plant turning yellow, followed by fire or botrytis turning them brown. (2) Bunchy top, the main stem divides into several stems, forming a bunchy top, with leaves tending to curl and harden. (3) Bud Blast, a symptom found usually in plants where primary bulb infestation carried over. Take particular note of plants showing bud blast. Throw out any suspicious plants.

DARWIN TULIPS

Darwin Tulips

Next Easter will be March 28, 1948, an exceptionally early date. This means early planting of all Easter stocks to insure that they will flower in time for most profitable sale.

Cut Tulips sold in the early months of 1947 brought excellent prices. The earlier your flowers are brought in, the better are chances of a good market. By placing your order early, your bulbs will be shipped as soon as they arrive this fall, and you can get them growing quickly.

DON'T LET YOUR BULBS FREEZE

If you do not have a bulb cellar and are obliged to store your bulbs outside be sure you have them set on cinders or ashes so they get plenty of drainage. When the bulbs are put in flats or pots and then placed on cinders they should be covered with sand or fine ashes at least three inches above the pots or flats. When real cold weather sets in cover with straw or manure. If you hard freeze the bulbs you can look for trouble.

Imported Hyacinths OF GOOD QUALITY

Hyacinths of this year's crop are of good quality even with an unfavorable growing season. However, the demand here and other countries is much larger than last year and prices are advancing. At present prices hyacinths offer to the florist one of the best opportunities to grow at a minimum risk and cost pot plants of first quality, which can be sold at good prices in the spring market. Miniature size bulbs grown in flats for cut flowers offer a sure crop and good profit.

Due to crop conditions please allow us to substitute other varieties and sizes on your order for Hyacinths.

NARCISSI—AMERICAN AND HOLLAND GROWN

Our Holland-grown bulbs will come from a grower that has kept up his stocks even after the U. S. embargo went into effect in 1926, because of a good demand from other countries.

Our American-grown bulbs are grown in Oregon, and Washington where narcissi bulbs grow best. The most modern implements are used so that bruising and disease are reduced to minimum. After digging, our bulbs are stored in temperatures that have been found most satisfactory by eminent English and Dutch experimenters. This temperature treatment hastens the flowering period and keeps the bulbs firm.

One of our representatives makes an inspection each season when the bulbs are in bloom and again after the bulbs have been lifted and placed in trays in the warehouses. Therefore our customers are assured of the best quality.

Mixed hardy daffodils are lower in price than tulips this fall for the first time we remember, and by almost 50%! Many more should be sold, in view of the tulip shortage. We offer a special picture package in brilliant color containing 25 mixed bulbs, and giving cultural instructions. Sure to be a rapid seller. No waste, no picking over.

Vaughan's American Grown Lily Bulbs

This year more than ever growers must be very careful to know their source of supply so as to get bulbs that are clean, grown right, and prepared with the correct storage until shipped to give you best results at Easter time. A few pennies saved on the cost of your bulbs may cost you many dollars in the long run.

CREOLE LILIES (Certified Louisiana Grown.) LOUISIANA QUEEN

In Louisiana Queen, we offer the cream of the Louisiana crop. The bulbs are certified by the state entomologist to have less than 5 percent (5%) fleck. Contrast this with the fact that many fields inspected by our bulb buyers show sixty to ninety percent fleck. Such stock does not produce satisfactory bulbs for greenhouse forcing, as the flowers come deformed, split or blast buds easily.

Our bulbs will be kept at the proper temperature while being packed for shipment in ventilated sheds, and then loaded in iced refrigerator cars. We expect to have some bulbs ready for planting in September to produce flowers in January and February.

CROFT LILIES

Because the growing season of Croft lily bulbs on the west coast is at least two weeks earlier this year we expect to make delivery in ample time to force for Easter where 60 degree temperatures can be maintained.

To insure this our bulbs will be generously graded and they will be cooled properly for easy forcing in 130 days at 60 degrees with maximum bud count. All bulbs will be from inspected fields, free from leaf nematodes. For description of this pest see Page 2.

THIS GROUP OF VAUGHAN'S GIANT AMARYLLIS WON FIRST PRIZE AT THE NATIONAL FLOWER AND GARDEN SHOW, CHICAGO, 1942

Giant Hybrid Amaryllis

One of the finest strains of Amaryllis we have ever seen. Flowers are immense, composed of broad, well-rounded, overlapping petals; of the most perfect form, ranging in color from pure white grounds with varied markings of rose, red and crimson to the richest self colors as scarlet, crimson, bright red, cherry and almost maroon.

Bulbs $2\frac{1}{2}$ inches and more and are sure bloomers.

Make wonderful window displays.

ANEMONES

One of the most showy flowers, good for cut flowers. They thrive in any soil except a very heavy clay. Set 10 inches apart, about $\frac{1}{2}$ inch deep. Sunny location, plenty of moisture. **De Caen**, number one bulbs, per 100, \$3.75; per 1,000, \$32.50.

Anemone St. Brigid Irish Champions. The largest flowered strain of Anemones ever offered in the United States. Large, brilliant flowers in a wide variety of colors, over 90% full double. Number one bulbs, per 100, \$4.50; per 1,000, \$40.00. Number two bulbs, per 100, \$2.75; per 1,000, \$25.00.

BRODIAEAS

Capitata. The California Hyacinth, has slender stems, 6 to 12-inch, high capped with a close cluster of violet blue flowers. Flowers hold up well, so should be good for Florist's use. 100, \$3.75; 1,000, \$32.50.

CHIONODOXA (Glory of the Snow)

These are among the most beautiful of our spring-flowering bulbs, coming into bloom soon after the snow is gone. Grows well in any good garden soil, and when once planted requires no further care. Looks best when planted in lines or clumps.

Lucillae. Flowers of a brilliant sky-blue color with white center. Per 100, \$1.75; per 1,000, \$12.00.

Sardensis. Deep blue. Per 100, \$1.75; per 1,000, \$12.00.

CALOCHORTUS or MARIPOSA TULIP

These famous California flowers resemble a tulip in shape, and are of many colors, shades and markings. Try a few in a cool house.

Mixed, per 100, \$4.50; post paid; per 1,000, \$40.00.

WHITE CALLA

(Aethiopica) Ready in September

Callas being natives of swampy regions grow to best advantage where there is an abundance of moisture, and are therefore very difficult to handle in the curing. Some growers practice **premature cutting off the tops**, expose bulbs to the sun, in order to make early shipment.

Our stock is **thoroughly cured in the ground and dried carefully** before they are packed. This means **later delivery** but better results can be obtained from such bulbs.

We caution forcers of Callas to water this stock sparingly after planting because Calla bulbs store up considerable moisture.

BABY GLADIOLUS

Years ago when the bulbs could be imported they were very popular. Limited quantities are now being grown on the coast so we can offer them again. Wonderful for forcing. Unsurpassed for bouquets, baskets and other uses.

Peach Blossom, delicate pink. Per 100, \$5.50; 1,000, \$50.00.

IXIA

These easily grown, quick selling bulbs are rapidly becoming popular as cut flowers. Planted from September to early December in pots or bench, they produce beautiful, long stem flowers during late February and early March. Main requisites for successful growing are careful watering at beginning of growth, and a cool temperature (Carnation temperature, or cooler).

Lilies

Seeds sown in October or November should be transplanted into 2½ inch pots or bands 3 or 4 months after sowing. Carry along until August when they should be planted in the bench 6x8 inches apart or grown in 4 or 5 inch pot. These will grow into plants carrying 2 or 3 flowers the following Spring.

If only buds are cut at this time, letting the foliage dry down by gradually withholding water, and then placing bulbs in cold storage at 32 to 40 degrees and then potting; the next Spring a much higher bud count can be expected.

Longiflorum Praecox (White Queen). Produces Trade pkt. Oz. blooms of the well known Erabu type in from 12 to 15 months after sowing. Long trumpet flowers of clear white. ½ trade pkts., 60c; ¼ oz. \$2.50; ¼ oz. \$4.50 \$1.00

Lupinus

Free-flowering, easily grown annuals, with long, graceful spikes of rich and various colored pea-shaped flowers; valuable for cutting to follow "mums" or sweet peas as a "catch crop." Sow 3 or 4 seeds in a 3 or 4 in. pot. Keep in cold frame until late October or November. Transplant into a ground bed and grow slowly in cool temperature. Space 10x12 inches, water well after transplanting and then keep on dry side until plants are established.

Hartwegii Giants or King Lupinus. This improved giant strain is over a foot taller than the ordinary strain, reaching a height of 3 or 4 feet. There are five or six long basal branched spikes to each plant, bearing closely placed giant blooms.

PRIMULA

Ericksson's Malacoides (Baby Primrose) ORIGINATOR'S SEED

Recent improvements in this Baby Primrose class have made it indispensable for Florist's use. September sown seed will produce nice plants for Easter and Mother's Day.

RIVERSIDE STRAIN

- Glory of Riverside Improved** . . . True rose-pink, a strong grower and without a doubt, the most valuable variety for all purposes.
- Eriksson's New Giant** . . . Color resembles closely Glory of Riverside. Very robust habit, with flower size approximately 1½ inches. It is a late bloomer, thereby assuring the grower a longer Primula season.
- Eriksson's White Giant (New)** . . . An exceptionally strong grower and well adapted to combinations.
- Lilac Beauty** . . . The color is a pure soft lilac, absolutely fixed. This is another fine color for making up artistic combinations.
- Peach Blossom** . . . The color is a real deep peach-blossom pink. It has a compact habit and is an excellent keeper.
- Mrs. Eriksson of Riverside** . . . A glowing rose-red, a very strong grower with heavy flower stems and stiff foliage; large flowers in heavy clusters of medium height. It is the most outstanding new variety.

PANSY VAUGHAN'S IMPROVED SWISS GIANT MIXTURE

PANSIES

Pansies have long been a favorite with us. We introduced the Swiss Giants to American gardens and named and introduced the lovely Canadian variety, Maple Leaf, several years ago.

VAUGHAN'S IMPROVED SWISS GIANT MIXTURE

The flowers of this strain are of enormous size, 3 inches and over in diameter. They are perfectly round with overlapping petals, borne on strong stalks well above the remarkably luxuriant foliage. Thick petals, of a rich velvety texture, give this strain of pansy the required substance so necessary to a perfect pansy.

The superb colors and color combinations—are their distinctive feature. Excellent for greenhouse culture. Trade pkt., 60c; $\frac{1}{8}$ oz., \$1.30; $\frac{1}{4}$ oz., \$2.25; oz., \$8.00; 4 oz., \$30.00.

VAUGHAN'S SUPER SWISS GIANT MIXTURE

One of our leaders and represents the choicest strain of this popular and profitable flower. Combining the finest selections of several Pansy specialists, the perfect blending is further insured by the addition of separate colors that do not generally appear in the average mixture. Trade pkt., 75c; $\frac{1}{8}$ oz., \$1.50; $\frac{1}{4}$ oz., \$2.75; oz., \$10.00; $\frac{1}{4}$ lb., \$32.00.

VAUGHAN'S DWARF SUPER SWISS MIXED

This type, being shorter and more compact, is more suitable to plant sales. The color range is as good as that of the Improved Swiss. Trade pkt., 60c; $\frac{1}{8}$ oz., \$1.40; $\frac{1}{4}$ oz., \$2.40; oz., \$8.00.

GIANT SWISS SEPARATE SORTS

Swiss Alpenglow. Rich wine-red shades.

Swiss Berna. Dark violet-blue.

Swiss Blue (Ullswater. Thuner Sea). The most distinct rich deep ultramarine blue with darker blotches.

Swiss Coronation Gold. Flowers golden-yellow. Perfectly round flowers, slightly ruffled edges. This is the best pure yellow pansy.

Swiss Luna. Soft sulphur yellow, self without blotches, round substantial flower with frilled edge. A delicate and lovely color.

Swiss Pure White. The best pure white pansy.

Swiss Rhinegold. Canary-yellow with dark blotches.

Each of the above: Trade pkt., 75c; $\frac{1}{8}$ oz., \$1.80; $\frac{1}{4}$ oz., \$3.00; oz., \$10.00.

Swiss Giant Orange. A perfectly round flower with overlapping petals of good substance. Color is a vivid orange, the upper petals carrying a halo of golden yellow. The lower petal is a deep orange. Trade pkt., \$1.00.

VAUGHAN'S MAPLE LEAF GIANT MIXED

A distinct variety we introduced several years ago, having very large leaves and flowers of gigantic size, 4 to 5 inches across, perfectly round, of heavy substance in many attractive colors and color combinations. Trade pkt., 60c; $\frac{1}{8}$ oz., \$1.60; $\frac{1}{4}$ oz., \$2.75; oz., \$9.00.

VAUGHAN'S SUPER MAPLE LEAF MIXTURE "CANADIAN GIANTS"

This strain is even finer than the preceding, with flowers of unbelievable size and texture, larger than in any other strain, the plants are also of compact growth and the extra large foliage is a rich, dark green. Trade pkt., 90c; $\frac{1}{8}$ oz., \$1.75; $\frac{1}{4}$ oz., \$3.00; oz., \$10.00.

VAUGHAN'S GIANT MIXTURE

Large flowers of good substance in a complete color range in light and dark shades. Probably the best general complete high grade mixture obtainable. Trade pkt., 50c; $\frac{1}{4}$ oz., \$2.50; oz., \$8.00; $\frac{1}{4}$ lb., \$30.00.

Geneva Giant Mixed. Grown from Originator's Stock Seed. A very fine strain. Trade pkt., 75c; $\frac{1}{8}$ oz., \$1.50; $\frac{1}{4}$ oz., \$2.75; oz., \$10.00.

America, Ideal Bedding or Basket Pansy. Good substance with wide color range. Free-flowering. Trade pkt., 60c; $\frac{1}{8}$ oz., \$1.40; $\frac{1}{4}$ oz., \$2.40; oz., \$9.00.

Engelmann's Giant Mixture. Dark and light shades, huge flowers, compact and early flowering. Trade pkt., 75c; $\frac{1}{8}$ oz., \$1.75; $\frac{1}{4}$ oz., \$3.00; oz., \$10.00.

Masterpiece—Giant Curled. The colors are superb, mostly red and brown shades. Trade pkt., 50c; $\frac{1}{4}$ oz., \$1.80; oz., \$6.00.

Oregon Giants (Originator's Stock). A fine strain of giant ruffled pansies. The large flowers of heavy texture have a delicate fragrance and come in all shades and coloring. Long stems and luxuriant foliage. Pkt. 200 seeds, 50c; pkt. 500 seeds, \$1.00; 3 \$1.00 packets for \$2.00; $\frac{1}{2}$ oz., \$6.00; oz., \$12.00.

Vaughan's Long Stemmed Winter-Flowering Mixed Re-selected. It has a wide color range and has an excellent stem length, averaging better than 10 in. The bloom size is from $2\frac{1}{2}$ to 3 in. and the flowers are of very good substance and sweet scented. Sow in summer for Mid-winter blooming and give support early. $\frac{1}{2}$ Trade pkt., 60c; Trade pkt., \$1.00; $\frac{1}{8}$ oz., \$2.50; $\frac{1}{4}$ oz., \$4.80.

GIANT SPRING BEAUTY PANSY

A new development in Pansies brings this ever popular spring plant into an extra early flowering season with the added value of longer stems for cut flowers.

The plants are of sturdy, compact growth with upright habit and under good growing conditions produce strong stems from 7 to 9 inches long with large flowers of heavy texture. Although the color mixture consists largely of blue and yellow only, it is an ideal combination for spring. Besides useful for your own cutting for corsages and other spring combinations, these plants will find favor with your customers who will enjoy these early spring flowers. Trade pkt., \$1.00; 3 trade pkts., \$2.50; $\frac{1}{8}$ oz., \$2.00; $\frac{1}{4}$ oz., \$3.75; $\frac{1}{2}$ oz., \$7.00; oz., \$13.00.

Suggestions For Sowing Seeds During the Summer Months

During the hot months of July and August fine seeds such as Calceolaria, Cineraria, Snapdragon, and finer perennial seeds, etc. should be sown in flats (as usual) and the flats placed in a cool basement until the seedlings sprout, when taken to greenhouse and some cheese cloth placed over them until the seedlings are of sufficient strength to have it removed.

Stocks

Our Stocks are produced by the most careful growers and are equal to the best in the market.

Varieties preceded by star (★) are the most popular colors.

A leaflet on "Methods of Selecting Double Flowered Stocks in the Seedling Stage," by Prof. S. L. Emmseller, will be included in all orders for Column Stock seed.

"NON-BRANCHING" COLUMN STOCKS

These produce one enormous spike with large flowers, 2 to 2 1/2 ft. high, and can be planted close together in the bench, which makes them a profitable type. Are in season with Bismarck variety.

- ★**Apricot** (No. 20). Strong growing buff with a faint pink tinge. Blue. Dark lilac blue.
 - Chamois Pink**. A warm rosy buff color.
 - Deep Apricot**. Slightly darker color than Apricot No. 20 above.
 - Gardenia**. Flowers of the purest white. About 10 days later than White No. 16, also taller. Needs disbudding.
 - Illusion**. Scarlet red.
 - ★**Lilac Lavender**. Same as Silvery Lilac.
 - Pink** (No. 11). Light rose-pink, exact shade of Bismarck Rose.
 - ★**Rose Pink** (No. 14). A deep selection from No. 11; a rose-pink, not a deep heavy rose. Good market color. Long-stemmed, about ten days later than No. 11.
 - Purple Heart**. Long stemmed, bright violet purple.
 - Ruby**. Rich crimson red.
 - ★**Silvery Lilac**. Lilac lavender.
 - ★**Supreme**. No. 22. Supremely fine in its rich silvery rose shading, with extra long stems and fine heavy spike.
 - ★**Vaughan White No. 1**. We especially recommend this; in our judgment, the finest pure white Non-Branching Column Stock in existence.
 - ★**White, Improved No. 16**. Semi-tall pure white.
 - ★**Yellow Wonder**. Best yellow.
- Special Florist Mixed**. Mixture of the best selling colors.
- Each of above: 1/2 tr. pkt., 60c; tr. pkt. (about 1200 seeds), \$1.00; 1/4 oz., \$2.50; oz., \$9.00.

EXTRA DWARF COLUMN HYACINTH FLOWERED WHITE NO. 5

One of our growers reports this a fine item for Easter pot sales. Grows 12 to 14 inches high. Sowings made first to middle of November should be right for Easter this coming year. Transplant one seedling to a 3 inch pot. Soon as plants are coming into bud and you can determine the doubles pan them together putting 3 to 4 in a 6 inch pot, 5 in a 7 inch and 7 in an 8 inch. This grower sold his doubles in 6 inch pots at \$1.00 and singles at 75c wholesale. 1/2 trade pkt., 60c; trade pkt., \$1.00; 1/4 oz., \$2.50; oz., \$9.00.

GIANTS OF CALIFORNIA

This magnificent group comes very early, having the branching habit of the Bismarck, with mammoth flowers on longer stems. When planted close they make one long spike of mammoth florets closely packed around the stem.

Blood-Red "The Red Woods"	Rose "Yosemite"
Blue "Pacific"	Sequoia "Rose carmine"
Chamois "Santa Barbara"	Velvety Violet "Mojave"
Lavender "Tahoe"	White "Santa Maria"

Giants of California Mixed . Trade pkt., 35c; 1/8 oz., 65c; 1/4 oz., \$1.20; oz., \$4.00.	

IMPROVED GIANT BISMARCK (Early Giant Imperial)

One of the best Stocks, for both inside and outside planting. The plants grow in pyramidal form, about 2 1/2 ft., are strong and robust and are covered with large double flowers. Plant close and take out center shoot as soon as safe to get more and longer side branches which that way produce more flowers.

CALADIUMS—Vaughan's

Special Fancy-Leaved

Choice dormant bulbs for January and February delivery. Large variety named sorts. This is one of the most decorative plants for greenhouse growing, window boxes or show plants. Rich, ornamental leaves, handsomer than Begonias; marbled, veined and striped with white, pink and dark red.

Our mixture of named sorts is probably the best to be had. We have graded them especially for good size bulbs of the finest varieties.

We find an increasing demand for caladiums; pot plants sell readily from early spring until late summer.

FANCY-LEAVED CALADIUM

CALADIUMS are easily grown but should not be put in a Carnation temperature. Start the bulbs in flats, turning them upside down, since this is a crown-rooting bulb and the roots come out around the top (center) eye. This direct contact with the growing medium produces roots more quickly than the opposite method. Use a mixture of one part leaf-mold, one part good garden loam, and one part peat moss or other rubble for drainage. Press the bulb halfway into the soil and place the flats under a bench. The flats can also be placed on top of the flows, but if this is done, they should be shaded. The temperature should be 80 to 85 degrees or higher, as the higher the temperature, the better starting results you will have. Be careful that the flats do not dry out if placed either on the flows or returns. Water sparingly until the bulbs begin to sprout and have roots 4 to 6 inches long. When the sprouts begin to show, place the bulbs in 5 or 6-inch pots, using a good rich leaf-mold. Water copiously when in full growth and use weak liquid manure once weekly if possible.

Vaughan's Peonies

5 of a Kind at the 10 Rate—25 of a Kind at the 100 Rate

Prices are F. O. B. Western Springs, Ill., packing charges to be added at cost.

WE HAVE an exceptionally large stock of our own growing. Strictly true to name, all in strong divisions, with from 3 to 5 eyes each.

The figures preceding the varieties are the rating given to them by the American Peony Society.

Peonies in established plantings need to be fed each Spring. A top-dressing of a balanced plant food well worked in will do wonders, but it should be applied early.

FRENCH HYBRID LILAC

Ornamental and Flowering Shrubs

OUR shrubs are nursery-grown and are transplanted every two or three years. They are nice, shapely bushes with plenty of good fibrous roots, and are such plants as are in demand by the first class retail trade. They should not be compared to stock that is never moved from the cutting or seeding beds until sold.

Our Nursery is located at Western Springs, 15 miles west of Chicago on the C. B. & Q. R. R., two blocks south of 47th Street, on Wolf Road.

Visitors are invited to inspect our stock at any time. We have a choice lot of specimens such as are not usually seen. Our customers will be pleased with the class of stock we send them.

Shipping Directions: All stock is sold F. O. B. Western Springs. Packing charges to be added on all orders for shrubs, dormant roses, fruits, trees, evergreens, and vines, at cost. Always give full and explicit shipping directions, as our responsibility ends on delivery to the express or freight office in good condition. All trees, shrubs and plants shipped subject to customer assuming risk regarding their own State Nursery Inspection Regulations. Certificate furnished with each shipment.

Where personal selection of stock is made at our Nursery we charge according to its value.

Warning—Prices on all nursery stock subject to change without notice. 5 plants of one kind supplied at 10 rate. 30 plants of one kind supplied at 100 rate.

New Greenhouse Insecticides

Sodium Selenate Makes Plants Poison Insects

Sodium selenate, which Dr. W. E. Blauvelt of Cornell University told a florists' meeting at Cornell University, "is out of the experimental stage," when applied to the soil in a greenhouse bench is absorbed by the plants, and makes them poisonous to insects.

Over 18,000 pounds have been used in 1946, sufficient to treat over a hundred fifty million square feet of greenhouse bench area. One treatment of the soil is effective for three to six months.

Not all insects are affected. It works best with soft plants like chrysanthemums, carnations, gladioli, cyclamens, saintpaulias, etc., and has not been found entirely effective on woody plants. It kills red spider and aphid on chrysanthemums and carnations, cyclamen mites on chrysanthemums and saintpaulias, foliar nematodes and midge on chrysanthemums.

Complete instructions for use are sent with the material and must be followed closely.

PURE SODIUM SELENATE is a granular powder, very concentrated: One pound treats 1,800 square feet of bench area. This material is completely water-soluble. 100 grams (makes 1 gallon) prepaid \$1.50; per lb., \$4.00; 100 lbs., \$350.00. By express, charges collect.

P-40 IS TWO PER CENT SODIUM SELENATE and ninety-eight per cent carrier (superphosphate in the present material). It is a dilute material. Three pounds treat only 100 square feet of bench area. 3 lbs., \$1.50 prepaid; 25 lbs., \$4.25; 50 lbs., \$8.00; 100 lbs., \$14.00, by express, charges collect, 2,000 lbs., \$240.00.

Azofume 70 (Azobenzene)

The new fumigant for controlling Red Spiders on roses. Price per 5 lb. package, \$11.25; 10 lbs., \$20.00; 25 lbs., \$43.75; 50 lbs., \$75.00; 100 lbs., \$125.00.

AZOFUME 100. (Technical grade 100% Azobenzene). For use in electric or kerosene lamps generally used for fumigating with naphthalene compounds. Use in exactly the same manner as Fulex and other type vapors. Price, 5 lbs., \$13.00; 10 lbs., \$22.85; 25 lbs., \$48.75; 50 lbs., \$81.25; 100 lbs., \$130.00.

AZOFUME 10 (Dusting Form). We consider this dust as an ideal addition to the Azobenzene family. Where small pockets of spider occur in greenhouses on carnation and roses, dusting with Azofume 10 fills in. Also recommended for outside use on phlox, roses and evergreens. Price 4 lb. pkg., \$2.00; 50 lbs., \$17.50.

AZOFUME 45 CANDLES. Now you can fumigate easily and simply with Azofume in candle form. Merely light them, and after the flame has spread a few seconds, the flame is extinguished and the candle smoulders for about an hour. Each candle treats approximately 6000 cubic feet of greenhouse space; about one pound of candles to 25,000 cubic feet. No need to split the treatment into two or more applications. **AZOFUME 45** is effective on red spiders, cyclamen mite and most other types of mites found in greenhouses on **ROSES, CARNATIONS, MUMS, CYCLAMENS, CALLAS, HYDRANGEAS, GARDENIAS, CAMELIAS, GERANIUMS, IVIES, KALANCHOES, AGERATUMS, CINERARIAS, PRIMULAS, COLEUS** and many other plants, 24 Candles to a carton for \$10.80; 96 Candles to a case for \$43.20.

HYPOZENE 20-DUST. Contains 20% azobenzene plus 10% D.D.T. Controls Red Spider, Mealy Bug, Thrip, and many other insect pests. For spot dusting. Price, 5 lbs., \$6.00; 10 lbs., \$10.00; 25 lbs., \$22.00; 50 lbs., \$42.00; 100 lbs., \$80.00.

VAPOTANE. Contains Hexaethyl Tetraphosphate. Particularly effective against Red Spider aphids and many other insects. Price ½ gal., \$7.75; gal., \$14.50.

POST-WAR FUNGICIDE

FERMATE. This new fungicide which has been thoroughly tested gives remarkable control of plant diseases, with safety to all plants. Reliable specific for black spot on roses, leaf spot on chrysanthemums, snapdragon rust, anthracnose of tomatoes, and brown rot of cherries. Recommended for use against all fungi and mildews. 3 lbs., \$2.85; 10 lbs., \$10.00; 25 lbs., \$18.75, shipped by express, charges collect.

Protexall Combats All Plant Pests

PROTEXALL, introduced by us last year as a one-shot spray or dust using new post-war insecticides and fungicides to combat almost all insects and plant diseases with one treatment, has been remarkably successful.

Against roses, notably plagued by pests of both descriptions, a veteran rose grower reports: "Protexall Dust on my roses has been 100 percent effective as to aphids, virtually 100 percent as to fungous diseases; then following the June blooming season when the rose midge usually appears but this year did not, I had 90 percent of the normal July bloom as compared with 10 percent which has been the rule for 10 years past."

PROTEXALL CONTAINS

D. D. T., which kills most garden insects.

ROTENONE, fatal to aphids, bean beetles, and all others which may be unharmed by D. D. T.

FERMATE, harmless to all plants, and giving complete protection from many pests which resist other materials.

SULPHUR, which deals with most troubles which fermate does not.

Protexall spray is a powder which mixes easily with water. Protexall Dust comes mixed with a spreader and is ready for instant use. It is necessary to order the form you prefer and have the equipment to use, since the spray material does not make an efficient dust, and the dust cannot be used as a spray.

PROTEXALL SPRAY, 1 oz. package retails at 35c, price per carton of 24, \$5.04; 4 oz. package retails at \$1.00, per carton of 12, \$7.20; 5 lb. package, \$9.00. 1 oz. will make approximately 4 gallons of spraying solution.

PROTEXALL DUST, 1 lb. package retails 75c, price per carton of 24 packages, \$10.80; 4 lb. package retails at \$2.00, per carton of 12, \$15.84; 50 lb. bags each, \$22.50.

D. D. T.-Yamtox

Use of DDT alone seems to have a tendency to increase the infestation of other insects that it does not control. This may be due to killing off desirable parasites, or freeing them from competition. DDT Yamtox contains the full complement of rotenone necessary for the control of red spiders and other mites, thrips and aphids. The incorporation of 5% DDT in it widens its range of use to the satisfactory control of tarnished plant bug and leaf rollers. Where the plants are easily damaged, or where it is desired to spray open flowers of mums, or to dip the entire plant, as in the case of cyclamen mite, Yamtox DDT sure fits the bill.

Yamtox is a concentration of the active principles of the Yam Bean (*Pachyrhizus erosus*). The Yam Bean affects many insects in much the same manner as Rotenone and seems to be the nearest approach to it. It has been used for centuries in the control of pests on vegetables in some parts of China. In Yamtox the toxic effects of the bean are extracted to make them as available as possible. They are further strengthened by chemicals of proven toxicity. Especially recommended for the control of Plant Lice, Red Spider, Thrip, Cyclamen Mite, Cabbage Worms, and most other insects that are controlled by Rotenone. It is very mild upon Plant Growth and safe to use even on most tender plants. Price per gallon, \$12.00; case of 6-1 gallon cans, \$11.00 per gallon.

GRAIN-O. For rooting Cuttings, Bulbs; Treating Seed. For rooting just dip basal end of cuttings or bulb in powder. Or, for bigger yield at amazing low cost, just dust Grain-O powder on all your garden and field seed. It inoculates it with hormones and vitamins; makes bigger rooted, drouth resistant plants; encourages healthier growth, increases yield. For corn, costs only ½¢ to 4¢ an acre. Packet sufficient for average garden retails 25c; 2 dozen in colorful display card, shipping weight, 1 lb. 11 oz. price \$3.60 per display; 20-in-one size, package retails \$1.50; carton of 10, \$9.00; 1 lb. size, retails \$3.95, per carton of 10, \$24.00.

Chemical Weed Killers

New Dandykill with Nitrogen

Careful tests of Dandykill, the dry, soluble form of the miracle weed killer 2,4D have developed these important facts:

1—That chemical nitrogen in the Dandykill solution will stimulate growth so grass quickly spreads to vacant spaces left by dying weeds.

2—That Dandykill at normal strength destroys many seeds of crab grass and kills small crab grass plants.

3—That Dandykill one-half recommended strength used on bent greens and lawns, kills most weeds without injuring the grass, though occasional brief discoloration may result.

Dandykill offered this year contains a concentrated form of nitrogen quickly soluble in water, in an amount which will not burn the grass leaves, but will produce immediate acceleration of growth.

Experiments show that weeds may be divided into three classes, according to their resistance to Dandykill.

CLASS 1—WEEDS EASY TO KILL

The following weeds succumb to Dandykill solution of one-half recommended strength, safe to use on bent grasses and clover.

Buttercup, Cinquefoil, Cress, Dandelion, Dichondra, Dock, Fleabane, Gill-Over-The-Ground, Heall-All, Knotweed, Lamb's Quarters, Lespedeza, Lippia, Moneywort, Milk Thistle, Mustards, Wild Onion, Pennyworts, Plantains, Purslane, Prickly Lettuce, Shepherd's Purse, Sow Thistle, Speedwell, Strawberry, Veronica.

CLASS 2—RESISTANT WEEDS

The following weeds require one-third more Dandykill to make a given quantity of solution, than is recommended for standard use:

Canada Thistle, Field Bindweed, Goldenrod, Hoary Cress, Horse Nettle, Leafy Spurge, Milkweed.

Except in dealing with the weeds specified above, the standard recommended strength of Dandykill should be used on lawns, according to the directions which come with the material.

TERRA COTTA GRASS GROWING HEADS

Heads should be soaked in water for 24 hours; also soak seed in separate dish over night. Fill the head with water and spread the seed very thickly all over head. Keep head filled with water at all times. In warm temperature seed may appear to be dry, if so, spray lightly with water using care not to wash seed off head. Keep in a saucer to protect the furniture.

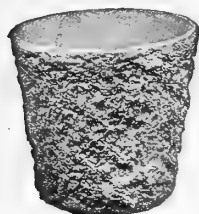

We can supply "Sunny Jim," with seed, per doz., \$3.00, packed 24 to a carton at \$5.80 per carton. Retail at 40c each.

We can also supply the larger heads. "Bud-dy" with seed at doz., \$3.85; per carton of 24, \$7.20. Retail at 50c.

Jardiers, Vases and Tubs—Thermometers

Jardier Pot Covers. Popularize the potted plant—because they safeguard the appointments of the finest homes—table tops, linens, window sills—from soilage and overflowing saucers. These are inexpensive, yet take the place in beauty and service of expensive jardinieres. Save time and labor over other methods of trim.

Flower Seeds in Record Breaking Demand

Vaughan's Packet Seed Assortments have a selection of flower seeds which few seed stores can equal, and flower seeds will be the "hot" item this spring. Home gardeners will tend to concentrate also on the luxury vegetables of super-quality, in which we specialize. This is a business which belongs to the florist, and Vaughan's Seeds a line which he can recommend. They are not on sale by every other outlet in your neighborhood. Make sure of your assortment by ordering early.

OUR COLORFUL DISPLAY RACK

Attractive Two-Tone Display Rack

For 1948 our light-weight, decorative display rack will be made in combination of buff and green, which is attractive in itself and will harmonize with your store display.

Design and construction of the rack will follow the model which has proved so satisfactory last year.

The illustration shows how it holds each variety where the customer can see it.

The dimensions of this rack are: 30 inches wide, 15 inches deep, on the floor. The height is 55 inches, nicely calculated to combine maximum visibility of packets, and convenient self-service, while at the same time it does not obstruct a clear view of the store, which many feel is important.

Your new rack will be light, yet strong, easily moved about. It is made in the modern manner, of heavy matboard, and comes to you brand new. One rack will hold \$100 worth of packets.

Our New Packets. All flower seed packets of 1948 will be $3\frac{1}{4}$ by $4\frac{1}{2}$ inches, same size as vegetable packets, and all racks will be interchangeable, serving for either flower or vegetable seed.

Brilliantly Colored Posters and Streamers. Color sells everything now-a-days and nowhere is it more necessary than in selling the garden. Vaughan's posters are modern, artistic, brilliant. They will dress up your store and give it the atmosphere of spring, helping business in every line.

Extract from Florist Exchange. March 29, 1947

Sweet Peas were the main attraction in the commercial classes Wednesday at the New York Flower Show Spring 1947, and the scale of points upon which they were judged gave 60 points to quality of bloom, 30 for artistic arrangement and 10 for general effect. The entries covered a 50 sq. ft. table arranged for effect with foliage and accessories permitted. Vaughan's Seed Co., N. Y., took first. The blooms shown by Vaughan's were grown by A. J. Maier, Wantagh, N. Y., and included Twilight, Bridesmaid, Snow Queen, Boon, Sequoia, Triumph and Daphne. Stem length averaged well over a foot and all stems bore at least four flowers.
